

F30Z

- > External glazing louvre
- > Integral mesh
- > Architectural window frame

APPLICATION

The F 30Z is an architectural window louvre manufactured from extruded aluminium profiles. The stackable blades guarantee a unique robustness. The perforated blade profiles act as an insect screen (2 types of perforations). The Z shaped blade ensures a robust design.

WEATHERING PERFORMANCE

Class B to EN 13030: insect mesh
Class C to EN 13030: bird mesh

DESIGN

Frame/Blades

material: extruded aluminium
finish: polyester powder coating

Mesh

material: stainless steel or PVC insect mesh

AVAILABLE TYPES

F30Z blade type

- **P1 Punch**
integral insect mesh
- **P2 Punch**
integral bird mesh (available with optional insect mesh)
- **NP No Punch**
100% screening (dummy louvre)

REMARKS

All dimensions are given in mm.

1000	-	-	-	-	-	-	-	-	-	4,691

NOTES

Effective size:
Nominal size -58 mm (up to 1000 x 1000 mm)
Minimum recommended height 200 mm
10,000 cm² = 1m² free area

For sizes above 1000 x 1000 free area's and aerodynamic performance can be used for selection.
